

Neutral Density (Opacity) Filter Re-certification Made Easy

Air Quality Services recognizes that preparing your filters for certification often constitutes an annoyance that can detract from the high priority tasks that CEMS/COMS technicians perform on a daily basis. That is why AQS has put together a package that will not only streamline the filter re-certification process, but will also help protect your filters from damage or degradation throughout the year. Here's the deal:

AQS will package your filters in a Seahorse® brand industrial-quality protective case on your next filter recertification order. These lightweight, yet extremely strong cases are provided **free of charge**, and are specifically designed to protect and organize your filters. Plus, they double as durable shipping containers to ensure safe and secure transport to and from our state-of-the-art neutral density opacity filter testing laboratory. Your case will be custom configured and sent back to you with your next order:

AQS' opacity filter protective case/shipper is unbreakable, watertight, airtight, dustproof and corrosion proof. It is highly resistant to chemical attack, and is built to perform in the most severe conditions. Features include: fold down handle; security padlock holes; and O-ring seal.

- **Pick & Pluck Foam Interior** – Allows for custom configuration of interior cavities to protect your valuable filters throughout shipping, during storage, or whenever exposed to potential hazards. When you submit your next order, please include all items (filters, blanks, jewel cases, pouches, etc.) that you desire to be contained in the case. AQS will customize your case to accept these items. *This will be the last time you will have to assemble and package your opacity filters for shipping.*
- **Shipping Materials** – Everything you need is contained within the case. Simply complete the enclosed submittal form, remove the preprinted self-adhesive shipping labels and affix to the case lid. Then remove the enclosed nylon ties and secure the lid to the case body. The case is now ready to be shipped. *No more searching for boxes and packing materials, no more boxing & taping, no more completing shipping forms, and no more wondering whether your filters will return in the condition that you sent them.*
- **Reminders** – Next year certification date will be clearly posted on the exterior of case. AQS will also send a separate reminder to your attention one month before the next year certification is due.

We offer competitive pricing, with normal turnaround (10 business days from receipt to return shipment) at \$75.00 per filter, and rush turnaround (please call to schedule) at \$95.00 per filter. Discounts are offered for credit card purchases and for payment by enclosed check. To take advantage of this offer, simply complete the Opacity Filter [Order Form](#) and submit along with your filters and accoutrements. We'll take it from there.
